EXCALIBUR provides expert consulting services in environmental underwriting risk, claims stop-loss and asset management, specializing in tailoring environmental solutions to clients' *business* needs. We take multidimensional approaches to problem solving, focusing more on *why* our clients may have an environmental need than the process required to meet the need.

EXCALIBUR helps insurance, industrial, commercial, financial and other sector clients account for the interplay and tradeoffs among site-specific risk, regulatory, technical, and economic variables affecting their businesses. More importantly, **EXCALIBUR** cuts to the chase, translating findings into the bottom line underwriting risks and schedule, capital, operating, and present value cost implications, allowing clients to make informed business decisions.

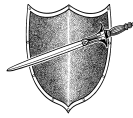

EXCALIBUR's philosophy, client advocacy, and depth of experience keep our clients on the cutting edge in solving the most challenging environmental problems.

ENVIRONMENTAL CONSULTANTS, ENGINEERS AND LIABILITY MANAGEMENT EXPERTS

Customers Rank **EXCALIBUR** as Top Notch

EXCALIBUR is absolutely focused on meeting clients' integrated environmental and *business* needs. While other firms "process orders" and conduct "additional studies", **EXCALIBUR** implements critical actions and delivers solutions recognized through extensive repeat business and client referrals.

The company's success in representing clients' needs and interests is best illustrated by the results of an independent survey of **EXCALIBUR's** own customers conducted by Dun & Bradstreet. The Customers ratings concluded the company's overall performance was Superior.

INDEPENDENT CUSTOMER SURVEY RESULTS

The survey, which assessed **EXCALIBUR's** overall performance in 9 separate categories concluded the company's overall performance was rated in the 94% percentile on a scale of 1 to 100. As independent survey results show, **EXCALIBUR** is unanimously viewed as a highly effective environmental service provider by those most familiar with their capabilities.
